TheRedot M2

Mini Thermal Red Dot

Red-dot size. Thermal capability. Multi-platform use.

APPLICATION SCENARIOS

Handheld Observation

Quick scanning and instant target awareness.

Helmet-Mounted Use

Lightweight monocular thermal observation.

Rifle Platform Support

Compact thermal support for close-to-mid range use.

Pistol Platform Support

Red-dot-style thermal solution for compact firearms.

Also adaptable to shotgun platforms

CORE ADVANTAGES

115g Lightweight Body
Less impact on firearm balance and handling.

No APP Dependency
Independent touch control, lower software after-sales burden.

Intuitive Touch Control
Easy operation with a short learning curve.

Wide FOV & Low Latency
Fast scanning and smooth target tracking.

B2B VALUE

Low-MOQ New Category Entry

Test the mini thermal market with lower inventory pressure.

Lower Software After-Sales Burden

No APP dependency reduces connection and compatibility issues.

Strong Product Differentiation

A unique category between red dots and thermal optics.

OEM / ODM Branding Support

Logo, package, finish and product positioning support.

[A compact thermal device built around real application scenarios.]

TherComp X2

Hunting Thermal Rifle Scope

Compact thermal aiming.
Better rifle balance. Practical night hunting.

-  **COMPACT FORM**
Less front burden,
better rifle balance.
-  **PRACTICAL PERFORMANCE**
Designed for real target
detection and aiming.
-  **BUILT FOR HUNTING**
Reliable, intuitive,
Ready when you are.

COMPACT SIZE
BETTER BALANCE
NO COMPROMISE

Built for Real Hunting Use

Thermal hunting should not become oversized
and front-heavy.

TherComp X2 is built for hunters who need
usable thermal performance in a compact,
rifle-ready format — with less impact on
firearm balance and handling.

COMPACT
Rifle-friendly
form factor

BALANCED
Maintains better
rifle balance

PRACTICAL
Usable performance
for real hunting

FAST DEPLOY
Quick-attach
Quick ready

CONTROL INTERFACE

Intuitive buttons.
Easy operation.

Core Advantages

COMPACT RIFLE-READY DESIGN

Designed to stay more
balanced on the rifle.

INTEGRATED QUICK-DETACH MOUNT

Fast attachment and
removal for practical
field use.

USABLE THERMAL PERFORMANCE

Built for real target
detection, separation,
and aiming.

LRF + BALLISTIC SUPPORT

Helps improve ranging
and shooting efficiency
at night.

SCALABLE PRODUCT MATRIX

256 / 384 / 640
options for different
market levels.

LRF MODULE

integrated rangefinder.
improve efficiency
at night.

LRF

ACCURATE RANGING
EFFICIENT AIMING

Application Scenarios

NIGHT HUNTING

Built for real hunting
after dark.

FARM & PEST CONTROL

Useful for practical
field control work.

WOODLAND & OPEN FIELD USE

Suitable for different
hunting environments.

CLOSE-TO-MID RANGE AIMING

Designed for efficient
thermal rifle use in
real scenarios.

B2B Value

LOW-MOQ PRODUCT LINE ENTRY

Start with lower
inventory pressure.

COMPACT FORMAT WITH STRONG MARKET APPEAL

Easier to position than
oversized thermal scopes.

PRODUCT LADDER EXPANSION

Supports entry,
mid-range, and
premium thermal
offerings.

OEM / ODM BRANDING SUPPORT

Logo, packaging,
finish, and positioning
support available.

A COMPACT THERMAL RIFLE SCOPE BUILT FOR PRACTICAL HUNTING PERFORMANCE.

LOW MOQ • OEM/OOM • BRANDING PACKAGE • GLOBAL FULFILLMENT • PRODUCT LINE SUPPORT

TherView M1

Lightweight Handheld Thermal Monocular

Pocketable. Compact. Lightweight.
Built for fast thermal observation.

Pocketable

Compact

Lightweight

Built for Portable Thermal Observation

Thermal observation starts before aiming.

TherView M1 is designed for hunters, outdoor users, and distributors who need a compact, lightweight thermal observation tool that is easy to carry, easy to use, and ready for real field work.

- ✓ Lightweight carry
- ✓ Compact size
- ✓ Fast target detection
- ✓ Practical field use
- ✓ Lower entry barrier for thermal observation

Core Advantages

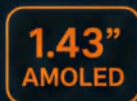

Pocketable & Lightweight

Compact size and easy carry for field observation.

Fast Thermal Detection

Useful for quick scanning before aiming.

1.43" AMOLED Display

Comfortable real-time viewing experience.

10mm / 15mm Lens Options

Different focal lengths for different observation needs.

3200mAh Battery & USB-C

Portable power support for longer outdoor use.

Application Scenarios

Night Hunting Observation

Detect heat sources before switching to aiming devices.

Farm & Field Patrol

Useful for livestock area patrol and pest checking.

Camping & Outdoor Safety

Quick thermal awareness in low-light environments.

Search & General Outdoor Use

Compact thermal tool for broader outdoor applications.

Feature Highlights

Wi-Fi / APP Viewing

Supports mobile viewing and sharing.

CVBS External Screen Support

Can be used with an external display for flexible observation setups.

Portable Field Design

Built for carry, scan, and quick deployment.

B2B Value

Low-MOQ Market Entry

Suitable for brands testing entry-level thermal observation markets.

Broad Channel Compatibility

Can be positioned for hunting, outdoor, camping, patrol, and distributor channels.

Easy Product Line Extension

A practical entry product for broader thermal product planning.

OEM / ODM Branding Support

Logo, packaging, finish, and branding support available.

A lightweight thermal monocular built for portable field observation.

Low MOQ

OEM/ODM
